### About the Course

This 2 day course in Pharmaceutical Potent Compound Safety, taught by the leading industry experts in potent compound safety, is designed for EHS and related professionals who need to understand the critical concepts of evaluating and safely handling pharmaceutical compounds.

The intensive curriculum focuses on evaluation of compound potency and toxicity, sampling and monitoring protocols, control technologies and effective investigative and communicative approaches.

Attendees will learn:

- How compound potency and toxicity are evaluated
- How to establish targets for monitoring methods and conduct monitoring studies
- How to systematically approach safe handling of research compounds and “unknowns”
- Elements of comprehensive health and safety programs for safe handling of potent pharmaceuticals

### Who should attend:

- Pharmaceutical and chemical plant EHS professionals
- Facility and Process engineers
- Pharmaceutical R&D and safety coordinators
- Industrial Hygienists
- Safety Professionals,
- Environmental Engineers,
- Pharmaceutical QA and QC personnel
- Plant managers

**Cost: \$1200 USD (net) per participant**

**Fee includes two-day training, lunch, course materials and globally recognized Certificate of Participation issued by SafeBridge®**

**Deadline to Register: February 10, 2018**

**Eligible for 13 technical contact hours, 1.3 CEUs, 2.17 CMs**

### SafeBridge Course Instructors:

**Allan W. Ader, PhD, DABT** has over 20 years of experience in toxicology, risk assessment and industrial hygiene. He has an extensive background in evaluating complex environmental, health and safety issues and in developing solutions and programs. For more about Allan please visit our [website](#).

**Debbie Keys, CIH, CHMM** has over 30 years of comprehensive industrial hygiene experience, with a focus on pharmaceutical research & development and manufacturing, including 20 years at Syntex/Roche. Debbie also worked as an Industrial Hygiene Manager at Gilead Sciences. For more about Debbie please visit our [website](#).

### Co-Sponsored by

[Nayati International](#), a non-profit tax-exempt organization has been actively promoting workplace Health and Hygiene in India for the past several years. Nayati's training programs and [Occupational Hygiene Certificate courses](#) conducted with support and collaboration of several national and international experts are reputed to be of high calibre and continue to play a significant role in capacity development of health and safety professionals in India.
